# CERTIFICATE OF COMPLETION

**Walkers Hive**

Date: 22 Dec, 2025

## CERTIFICATE OF COMPLETION

To Whom It May Concern,

This is to certify that Mr. Abhinav Bhattarai has successfully completed an internship at Walkers Hive Pvt. Ltd. from 24 August 2025 to 10 December 2025.

During the internship period, Mr. Bhattarai actively participated in assigned responsibilities and demonstrated a strong commitment to learning and professional development. He showed the ability to apply theoretical knowledge into practical tasks, maintained a positive work attitude, and worked collaboratively with team members.

Throughout the internship, Mr. Bhattarai displayed discipline, responsibility, and a willingness to take on new challenges. His contributions were valuable to the organization, and his performance met our expectations.

We wish him every success in future academic and professional endeavors.

Sincerely,

Suman Dhital  
Chief Technology Officer (CTO)

## MENTOR'S RECOMMENDATION FROM COMPANY

**Walkers Hive**

**Date: 22 Dec, 2025**

**To Whom It May Concern**

**Subject: Mentor's Recommendation Letter for Mr. Abhinav Bhattarai**

I am writing to highly recommend Mr. Abhinav Bhattarai for future academic and professional opportunities. During his internship, I had the opportunity to serve as his mentor and work closely with him, allowing me to observe his professional growth, technical abilities, and work ethic firsthand.

Throughout his internship period, Mr. Abhinav Bhattarai consistently demonstrated strong dedication, responsibility, and a willingness to learn. He approached assigned tasks with enthusiasm and showed the ability to adapt quickly to new challenges. His commitment to meeting deadlines and maintaining quality standards made him a reliable and valuable member of our team.

In addition to his technical competence, Mr. Abhinav Bhattarai possesses excellent communication and collaboration skills. He interacted effectively with team members and stakeholders, contributing positively to a professional and productive working environment.

I strongly recommend him without reservation for any academic program, internship, or professional opportunity he chooses to pursue. Should you require any further information regarding his performance or qualifications, please feel free to contact me.

Sincerely,

Suman Dhital

Chief Technology Officer (CTO)

## **TRIBHUVAN UNIVERSITY**

**Faculty of Humanities and Social Science**

**Arunima College Bouddha, Kathmandu**

### **SUPERVISOR'S RECOMMENDATION**

I hereby recommend that this internship report prepared under my mentorship by **Mr. Abhinav Bhattarai** entitled “**Internship Report on Digital Growth**” in the partial fulfillment of the requirements for the degree of BCA in Computer Application of Tribhuvan University and be processed for the evaluation.

As his supervisor during the web developer internship program at **Walkers Hive PVT.LTD**, I had the pleasure of working closely with him and observing his growth and development as a front-end developer. During the internship, he consistently demonstrated a strong aptitude for the CSS framework and web development in general. He was able to effectively utilize the various features of Bootstrap5 and JavaScript to design and build web applications, and he consistently sought to expand his knowledge and skills through independent learning and project work.

**LETTER OF APPROVAL**

This is to certify that this project prepared by **Abhinav Bhattarai** entitled “**Internship on Digital Growth**” in the partial fulfillment of the requirements for the Bachelor of Computer Application has been evaluated. In our opinion it is satisfactory in the scope and quality as a project for the required degree.

## ACKNOWLEDGMENTS

First and foremost, I would like to express my deep gratitude to **Mr. Suman Dhital** intern supervisor at **Walkers Hive PVT.LTD** for providing the opportunity to work as an intern in the organization. I'm grateful to all the mentors and staffs of the organization for their valuable cooperation, guidance, direction and continuous support throughout the internship period.

I would like to extend my sincere thanks and gratitude to our respected project supervisor and esteemed lecturer, **Mr. Alish Shrestha**, Department of Humanities and Social Science for his valuable suggestions, guidance, encouragement and inspirations that assisted us in completing this work. His useful recommendations for shaping up this whole work and cooperative support are sincerely acknowledged.

An honorable mention also goes to **Mr. Bipul Raj Manandhar**, Head of Department, Department of Humanities and Social Science for his kind and cooperative support, valuable time and guidance, as well as suggestions. His useful suggestions and cooperation has played a key role in this project.

The success and final outcome of this report required a lot of guidance and assistance from many individuals and I am very fortunate to have got this all along with the duration of this project. Therefore, I would like to extend my deepest thanks to the entire faculty for their constant support and guidance.

At the end, I would like to express my sincere thanks to all my friends, family and others who helped me directly or indirectly during this internship project period.

**Abhinav Bhattarai**

**6-2-142-1-2021**

## ABSTRACT

The digital marketing industry presents dynamic challenges in building visibility, engaging audiences, and measuring performance across multiple online channels. Effectively documenting real-world marketing experience and presenting it in a structured, professional format is essential for both personal branding and knowledge sharing. This project focused on the development of a Digital Growth Website, designed to showcase practical digital marketing experience, insights, and case studies through a content-driven web platform.

The project entitled “Digital Growth Website” primarily concentrated on the design and development of a responsive blog-based system using PHP, MySQL, HTML5, CSS3, Bootstrap 5, and JavaScript. The website enables efficient content management through an admin dashboard, allowing the creation, publication, and categorization of blog posts related to SEO, content marketing, social media strategies, and digital advertising. The system also emphasizes clean user interface design, SEO-friendly structure, and performance optimization to enhance user engagement and search engine visibility.

# **CHAPTER 1 INTRODUCTION**

## **1.1 Introduction**

The rapid growth of the digital marketing industry has transformed the way businesses build brand presence, engage audiences, and measure online performance. As digital platforms continue to evolve, there is an increasing need for structured systems that not only document practical marketing experience but also present insights in a professional and accessible manner. Traditional approaches to showcasing digital marketing work often lack organization, scalability, and effective content management, limiting their long-term value and impact.

The project entitled “Digital Growth Website” was developed to address these challenges by creating a centralized, web-based platform that documents real-world digital marketing experience through blogs, case studies, and analytical insights. The website serves as a professional portfolio and knowledge-sharing platform, enabling efficient content publishing while maintaining a clean and user-friendly interface.

As a digital marketing and web development project, primary emphasis was placed on designing a responsive and intuitive user interface that delivers a seamless experience across multiple devices. Technologies such as HTML5, CSS3, Bootstrap 5, JavaScript, PHP, and MySQL were utilized to achieve consistent design, effective content presentation, and efficient data management. Special attention was given to performance optimization, SEO-friendly structure, and accessibility to support broader reach and usability.

The development process followed a structured and iterative approach, allowing continuous improvements based on testing and evolving requirements. This methodology ensured alignment with industry standards while maintaining focus on the project’s core objectives of digital growth, content management efficiency, and professional presentation (Kotler, Kartajaya, & Setiawan, 2017).

## **1.2 Problem Statement**

The digital marketing domain faced challenges in effectively managing and presenting practical experience and marketing insights, including manual content creation processes, lack of a centralized content management system, difficulty in organizing and updating

blog posts, inconsistent data handling across different pages, and limited accessibility and mobile responsiveness of traditional portfolio or blogging platforms.

### 1.3 Objectives

The project entitled “Digital Growth Website” aimed at achieving four key objectives:

- To create a centralized and user-friendly platform for publishing, managing, and showcasing digital marketing content and practical experience.
- To streamline content creation and management processes through an efficient blog and admin system.
- To provide performance-focused insights by implementing SEO-friendly structure and analytics integration to evaluate content reach and engagement.
- To ensure secure handling of website data while maintaining responsive design, accessibility, and consistent user experience across devices.

### 1.4 Scope and Limitation

The scope and limitations of the project entitled “**Digital Growth**” are given below:

#### 1.4.1 Scope

- **Content & Blog Management:** Enables the administrator to create, publish, update, and manage digital marketing blogs, case studies, and experience-based content efficiently.
- **Web-Based Development:** Developed using PHP, MySQL, HTML5, CSS3, Bootstrap 5, and JavaScript to ensure a scalable and maintainable web application structure.
- **Responsive Design:** Ensures accessibility and optimal viewing experience across multiple devices, including desktops, tablets, and mobile phones.
- **User Interface:** Visitors can browse blogs and digital marketing insights seamlessly, while the administrator can manage posts, categories, and media content through the admin panel.

#### 1.4.2 Limitations

- **Limited Initial Deployment:** Initially developed as a personal digital

marketing platform and portfolio website, with scope for future expansion into a multi-user or commercial content management system.

- **Technology Constraints:** The platform is built using core PHP and MySQL without advanced backend frameworks, which may limit scalability and automation compared to enterprise-level solutions.
- **Continuous Improvement:** Requires regular content updates, performance optimization, and user feedback to enhance usability, search engine visibility, and overall website effectiveness.

## **1.5 Report Organization**

The report is divided into chapters, each focusing on various aspects of the internship project entitled “Digital Growth”.

### **Chapter 1: Introduction**

The first chapter introduces the project, including the problem statement, objectives, scope, and limitations.

### **Chapter 2: Introduction to Organization**

The second chapter focuses on the organization, covering its background, organizational structure, areas of operation, and a description of the department or unit where the internship was carried out.

### **Chapter 3: Background Study and Literature Review**

The third chapter presents the background study, including fundamental concepts, technologies, and methodologies related to digital marketing and web development. It also includes a review of related studies, platforms, and existing systems relevant to the project.

### **Chapter 4: Internship Activities**

The fourth chapter details the roles and responsibilities undertaken during the internship, weekly activities, technical tasks, project development process, and practical work completed for the Digital Growth website.

### **Chapter 5: Conclusion and Learning Outcomes**

The final chapter summarizes the overall internship experience, highlighting the project outcomes, conclusions drawn, and key learning experiences gained throughout the internship period.

## CHAPTER 2 INTRODUCTION TO ORGANIZATION

### 2.1 Organization Details

*Figure 2.1: Organization Logo*

Walkers Hive is a Nepal-based technology company dedicated to building strong digital partnerships that evolve with clients' visions. The company has been empowering startups, entrepreneurs, and growing businesses to transform bold ideas into impactful digital products.

Walkers Hive's mission is to create innovative and high-quality software solutions that empower businesses and individuals, enhancing their productivity, efficiency, and overall success. The company strive to deliver cutting-edge technology and exceptional user experiences through our talented team of software developers, engineers, and designers.

The company's vision is to be a globally recognized leader in software development, renowned for our technical excellence, innovation, and customer-centric approach. We strive to revolutionize industries and empower organizations of all sizes through transformative software solutions.

## 2.2 Organizational Hierarchy

*Figure 2.2: Organizational Hierarchy*

## 2.3 Working Domain of Organization

The working domain of Walkers Hive Ptd. Ltd. are given below:

- **Web and Mobile App Development:**

It specializes in building scalable and customizable web and mobile applications tailored to client requirements, including Minimum Viable Product (MVP) and full-scale digital solutions.

- **UI/UX Design and Frontend Development:**

It provides user interface and user experience design services focused on visually engaging and user-centric digital interfaces that enhance usability and accessibility.

- **Custom Software Development:**

It offers custom software solutions across diverse technologies including PHP Laravel, .NET, Python, Flutter, and Android development to meet specific business needs.

- **Digital Marketing and IT Consulting:**

Walkers Hive assists businesses with digital strategy and marketing alongside technical consulting to support growth and online presence.

## 2.4 Description of Intern Department/Unit: IT Department

During my internship at Walkers Hive PVT. LTD, I worked in the web-development department, where I helped design and develop the company's website and web-based applications. My tasks included redesigning and updating the website, adding new features, and testing and fixing issues to ensure the website worked properly.

I collaborated with and learned from the development team, which included skilled professionals with different areas of expertise. This experience helped me gain valuable knowledge about front-end development and improve my skills in this field.

**Table 2.1: Internship Details**

| Particular               | Time                  |
|--------------------------|-----------------------|
| Start Date of Internship | 24th August of 2025   |
| End Date of Internship   | 10th December of 2025 |
| Total Duration           | 3 months              |
| Office Hour              | 11:00 AM-6:00 PM      |
| Working Hours            | 8 hours               |
| Working Days             | 6 days                |
| Holiday                  | Saturday              |
| Position                 | Web Developer         |

# CHAPTER 3 BACKGROUND STUDY AND LITERATURE REVIEW

## 3.1 Background Study

### a) Evolution of Digital Growth

The development of digital marketing platforms and blogging websites has undergone significant transformation over the past decade. Early digital marketing efforts relied heavily on static websites and manually updated content, which posed challenges related to scalability, content management, and user engagement. With advancements in web technologies, digital platforms have evolved into dynamic, interactive, and data-driven systems that support content automation, analytics, and user interaction (Duckett, *Server-Side Web Development Concepts*, 2021). Key stages in this evolution include:

- (a) Initial use of static websites and manual content updates (2010–2014)
- (b) Introduction of content management systems and dynamic web pages (2014–2017)
- (c) Adoption of responsive and mobile-first design approaches (2017–2020)
- (d) Integration of SEO tools, analytics, and performance tracking features (2020–present)

### b) Industry Analysis

The digital marketing industry has distinct requirements for content presentation and growth management, including:

- (a) Effective content organization and categorization
- (b) Search engine optimization and visibility enhancement
- (c) Real-time content updates and performance monitoring
- (d) Audience engagement through interactive design
- (e) Consistent branding and professional presentation

Many existing platforms provide generic blogging solutions but often lack customization and practical focus required for showcasing real-world digital marketing experience, creating the need for tailored platforms such as Digital Growth (Chaffey & Ellis-Chadwick, *Digital Content Strategy and Online Growth Management*, 2019).

### c) Technical Landscape

Modern web development technologies have significantly improved the

development of digital marketing websites. Core technologies such as PHP and MySQL enable dynamic content handling and secure data storage, while HTML5, CSS3, Bootstrap 5, and JavaScript contribute to responsive design and interactive user interfaces (Duckett, *Dynamic Web Applications and Database-Driven Content*, 2021).

**d) Market Analysis**

The market for digital marketing and content-driven websites continues to expand due to:

- (a) Increasing adoption of digital solutions in education
- (b) Growing demand for specialized industry solutions
- (c) Rising importance of data-driven decision-making
- (d) Need for data-driven insights and performance evaluation

The adoption of digital platforms is influenced by trends such as responsive web design, analytics integration, content automation, secure data handling, real-time updates, and user-centric design principles (Chaffey, *Digital marketing trends and adoption of data-driven platforms*, 2023).

**e) Stakeholder Analysis**

The key stakeholders of the Digital Growth platform include website visitors, content creators, administrators, and digital marketers (Nielsen, *User experience principles for content-rich and stakeholder-driven websites*, 2022). These stakeholders require easy access to informative content, seamless navigation, efficient content management tools, performance tracking mechanisms, and secure system operation to ensure a reliable and professional user experience.

**f) User Experience and Interface Design in Professional Platforms**

Studies on user experience design for digital platforms emphasize the importance of structured information architecture, clear navigation menus, intuitive content layouts, effective typography, responsive forms, interactive components, accessibility compliance, readable color contrasts, and mobile-friendly design. A well-designed user interface enhances user engagement, improves content readability, and contributes significantly to the overall success of a digital marketing website (Nielsen, *Ten usability heuristics for user interface design*, 2020).

## 3.2 Literature Review

### a) Current State of Digital Marketing and Blogging Platforms

The digital transformation of blogging and digital marketing platforms has become increasingly important in recent years. Organizations and individuals adopting structured digital platforms have reported significant reductions in manual content handling and improvements in audience engagement. Modern blogging websites allow marketers to document experiences, publish case studies, and share insights efficiently (HubSpot, 2023). The growing demand for personal branding and professional online presence has highlighted the importance of dynamic, content-driven websites that support scalability and consistent content delivery.

### b) Technology Trends in Content Management Systems

Recent studies emphasize the importance of user experience in content-based platforms. Intuitive interface design, mobile responsiveness, and simple navigation structures are considered crucial factors influencing user adoption and engagement. Additionally, the integration of real-time updates, interactive components, and performance analytics has proven effective in increasing user interaction and content reach. These trends demonstrate the shift toward user-centric design in modern digital platforms (Google, 2022).

### c) Impact of Digital Platforms on Marketing Growth

Digital platforms play a vital role in showcasing digital marketing strategies, campaign results, and learning outcomes (Berthon, Pitt, Plangger, & Shapiro, 2012). Industry-focused digital platforms improve knowledge sharing, transparency, and practical understanding compared to traditional documentation methods. Platforms designed to highlight real-world marketing experiences enable better learning outcomes by presenting strategies, tools, and performance metrics in a structured and accessible format.

### d) Best Practices in Frontend Development for Content Platforms

Modern frontend development practices have evolved to enhance usability and accessibility in digital platforms. Responsive design principles, modular layouts, and component-based structures improve content readability and user interaction. Platforms implementing these practices often experience higher user satisfaction, improved navigation efficiency, and increased engagement across multiple devices.

**e) Performance Optimization in Web Applications**

Performance optimization is a critical factor in the success of digital marketing websites. Faster load times contribute significantly to improved user retention and lower bounce rates. Efficient frontend implementation, optimized images, clean code structure, and minimized server requests are essential to ensure smooth performance, particularly for content-heavy blogging platforms (Hassenzahl & Tractinsky, 2006).

**f) Security Considerations in Digital Platforms**

Security is a fundamental requirement for digital platforms handling user authentication and content management. Implementing secure coding practices, protected login mechanisms, and safe data handling techniques reduces vulnerabilities and enhances system reliability. Secure platforms foster user trust and ensure the integrity of published content and administrative functions ((NIST), 2020).

**g) Blogging and Content Platforms in Digital Marketing**

Content-driven platforms have become essential tools in digital marketing. Structured blogging systems allow marketers to document campaigns, analyze performance, and share insights effectively (Institute, 2023). Integrated digital platforms reduce administrative effort and improve content organization, making it easier to manage posts, categories, and media assets while maintaining consistent branding.

**h) Mobile-First Design Approaches**

Mobile-first design approaches have gained importance due to the increasing use of smartphones for content consumption. Platforms optimized for mobile devices demonstrate higher engagement rates and improved content accessibility (Kim & Sundar, 2016). Responsive layouts, touch-friendly interfaces, and optimized typography significantly enhance user experience and encourage longer interaction with digital content.

## **CHAPTER 4 INTERNSHIP ACTIVITIES**

### **4.1 Roles and Responsibilities**

The project entitled “Digital Growth” involved the completion of various roles and responsibilities during the internship period, which are outlined below:

#### **a) Website Development and Management**

- Designed and developed user-friendly, responsive web pages to present digital marketing experiences and blog content effectively across multiple devices.
- Implemented backend functionality using PHP and MySQL to manage dynamic content, user authentication, and blog post operations.
- Tested and debugged the website for smooth performance and functionality.

### **4.2 Weekly log**

The following log outlines the week-by-week progress made during the internship on the project entitled “Digital Growth”.

#### **Week 1**

- Orientation and introduction to the organization’s working environment and project objectives.
- Studied digital marketing fundamentals and content presentation strategies.
- Analyzed project requirements for developing a digital marketing-focused website.

#### **Week 2**

- Designed the basic structure and layout of the website using HTML5 and CSS3.
- Developed static pages such as Home and Blog sections.
- Implemented responsive design principles using Bootstrap 5.

#### **Week 3**

- Created blog listing and individual blog post page designs.
- Improved user interface consistency and readability.
- Added basic interactivity using JavaScript.

#### **Week 4**

- Designed the MySQL database and created tables for blog content and admin users.

- Established database connectivity using PHP.
- Implemented dynamic data retrieval to display blog posts on the website.

#### **Week 5**

- . Developed an admin login system for secure access.
- Implemented functionality to add and manage blog posts with images and categories.
- Tested form submissions and data storage operations.

#### **Week 6**

- Enhanced the website's visual design and layout alignment.
- Optimized image handling and improved page loading performance.
- Conducted thorough testing for responsiveness and usability.

#### **Week 7**

- Modularized PHP files using reusable components such as header and footer.
- Fixed issues related to navigation flow and page linking.
- Reviewed basic security practices including input validation.

#### **Week 8**

- Finalized the Digital Growth website with complete features.
- Evaluated the system against initial project objectives.
- Documented key learning experiences and technical skills gained during the internship.

### 4.3 Description of the Project Involved During Internship

During my internship, I worked on the development of a digital marketing-oriented website entitled “Digital Growth.” The project involved designing a responsive and user-friendly web platform to showcase digital marketing experiences and blog content. I developed frontend layouts and interactive components using HTML5, CSS3, JavaScript, and Bootstrap 5, and integrated backend functionality using PHP and MySQL for managing dynamic content and user authentication. I also tested and debugged the website to ensure smooth performance, proper database connectivity, and reliable functionality, gaining practical experience in real-world web development.

### 4.4 Tasks / Activities Performed

During the internship period, the following tasks and activities were performed as part of the Digital Growth project:

- **Design and Development:** Developed responsive and user-friendly web pages using HTML5, CSS3, JavaScript, and Bootstrap 5, ensuring compatibility across different devices and browsers.
- **Backend Integration:** Implemented PHP and MySQL to manage blog posts, categories, and admin login functionality for dynamic content handling.
- **Feature Implementation:** Added website features such as blog listings, single post views, image uploads, and navigation menus to improve user experience.
- **Testing and Debugging:** Tested website functionality, identified and resolved frontend and backend issues, and ensured smooth interaction between the database and web pages.
- **UI Enhancement:** Improved layout consistency, typography, and visual structure to maintain a professional and engaging appearance throughout the website.

## **CHAPTER 5 CONCLUSION AND LEARNING OUTCOMES**

### **5.1 Conclusion**

The project entitled “Digital Growth” represents a practical application of modern web development techniques in creating a digital marketing-oriented website. The project successfully addressed the need for a structured platform to present digital marketing experiences, blog content, and learning outcomes in a professional and user-friendly manner. By utilizing responsive frontend technologies and integrating backend functionality, the website ensures smooth content management and accessibility across multiple devices. Key achievements of the project include the development of responsive user interfaces, effective content presentation, dynamic blog management, and reliable system performance. The internship experience provided valuable exposure to real-world website development practices and enhanced understanding of building functional digital platforms using industry-relevant tools.

### **5.2 Learning Outcomes**

#### **a) Technical Skill**

- Gained practical knowledge of HTML5, CSS3, JavaScript, and Bootstrap 5 for responsive web design.
- Learned to integrate PHP and MySQL for managing dynamic content and user authentication.
- Improved skills in testing and debugging web applications to ensure smooth performance.

#### **b) Soft Skill**

- **Communication Skill**

Communication Skills improved through regular interaction with mentors and team members during project discussions.

- **Time management**

Learned to complete assigned tasks efficiently within given timelines.

- **Planning Skills**

Developed the ability to plan page layouts and functionalities before implementation.

# APPENDIX

## A.1 Result

*Figure A.1.1: Home Page*

The screenshot shows the 'Contact Us' form on the 'Digital Blog' website. The form is set against a light blue background. It begins with the 'Digital Blog' header and the 'Contact Us' title. Below the title are three input fields: 'Name', 'Email', and 'Message'. The 'Message' field is a larger text area. At the bottom left of the form is a blue 'Send Message' button.
